FRONT-END DEVELOPER

WORK EXPERIENCE

Freelance

Front-End Developer

2024 - present

- Design concept development and implementation for the main product application
- Designed and currently engineering a website via React, for an NGO that enables women below the poverty line to sell their handmade handlooms. Collaborated with stakeholders to build the website from scratch. This effort will enable women empowerment and also increase market reach.
- Developed an online platform via NextJS that enabled seamless casting of electoral votes via mobile devices. This increased the voter turnout by 1% and also improved the accessibility of the votes cast.
- Learning and Stakeholder Management: Demonstrated continuous learning by leveraging frameworks like React and NextJS to build impactful web platforms from the ground up. Collaborated with diverse stakeholders to translate varied requirements into cohesive user experiences.

Idealo Internet GmbH

2020 - 2022

Front-End Developer

| Berlin

- Enhanced user engagement on hotel.idealo.de by developing and maintaining its seamless UI across devices.
- Improved platform stability and user experience by resolving critical bugs and conducting usability testing, resulting in a 15% decrease in user-reported issues.
- Authored well-tested, documented Typescript, HTML, and CSS, ensuring high code quality and collaboration.
- Optimized user experience for performance and responsiveness across devices and browsers.

SOCIÉTÉ GÉNÉRALE

2017 - 2020

Full-Stack Developer

| Bengaluru

- Led end-to-end frontend development, deployment, and support for key banking platforms including Insta-KYC, UBO, and Embark, meeting critical business requirements.
- Built a chatbot UI for account opening, reducing user completion time by 40% through streamlined flows and responsive design.
- Built APIs for Abbyy OCR, enabling efficient text and XML extraction from PDFs and images.

SOCIÉTÉ GÉNÉRALE

2017

Internship

| Bengaluru

- Ensured smooth operation of the Image Processing Tool by effectively debugging and resolving critical issues.
- Developed a Java application using Pattern Matching to efficiently replace and consolidate strings across thousands of documents, improving data consistency.
- Designed and built an internal web application for progress tracking, enhancing team organization and project oversight.
